

Sr. Project Engineer/Project Manager

BHC Consultants is a consulting engineering, planning, and building code and construction compliance firm with offices in Seattle, Tacoma, and Bellingham, Washington. We are currently seeking a Sr. Project Engineer/Project Manager to join our engineering group in one of our three office locations.

BHC is a growing firm with a significant backlog of consulting services contracts for cities, counties, and special purpose districts in Western Washington. We are proud to be an employee-owned and managed consulting firm committed to the development and retention of our employees within a positive, collaborative, and challenging work environment.

The **Sr. Project Engineer/Project Manager** will:

- Play a key role in the continued growth of the company by identifying and developing new clients and projects.
- Demonstrate strong project management skills including the ability to develop scopes of work, budgets, and schedules during project planning, and the ability to deliver quality projects on time and within budget.
- Independently coordinate staffing and workload throughout entire project development and ensure completion of deliverables on schedule.
- Track financial aspects of projects and coordinate and adjust work effort with the team to ensure that work is completed.
- Demonstrate work experience in municipal engineering including sanitary sewer, storm sewer, water system and site civil (grading, pavement, sidewalk, etc.) design.

Required Qualifications:

- Bachelor of Science (Civil, Environmental, Chemical or Mechanical Engineering)
- Licensed Professional Engineer. State of Washington PE license required within 6 months of date of hire.
- 12+ years demonstrated success working on multi-disciplinary engineering projects.
- Strong technical leadership, mentoring and project management background.
- Strong verbal and written communication skills.
- Proficient with MS Office (Excel, Word, PowerPoint), and MS Project
- A positive attitude and commitment to being an active participant of our employee-owned culture.
- Demonstrated success working on multi-disciplinary engineering projects.

The following would also be of benefit:

- Working knowledge of AutoCAD, GIS and/or Revit (BIM) design software products
- Master's Degree
- Project management training, PMP certification or similar technical design leadership

- Experience with wastewater process modeling software (BioWin)
- Experience with Hydraulic modeling products (Innovyze, Bentley and/or Visual Hydraulics)
- Professional society involvement
- Established clientele and professional relationships

We Offer:

- Generous Total Cash Compensation
- 100% company paid Orca transportation pass
- 100% company paid employee Health, Life, and Disability insurance
- 60% company paid dependent Health Insurance
- 50% company paid dependent Dental Insurance
- Health Savings Account and Flexible Spending Account options to maximize tax savings
- Flexible schedules
- Reimbursement for professional registrations and renewals
- Paid memberships in professional organizations
- Paid time off (sick, vacation, holidays)
- 401(k) retirement plan with company matching contribution
- Ownership opportunity

We are an equal opportunity employer and value diversity. All employment is decided on the basis of qualifications, merit, and business need.
