

BHC Consultants is seeking a full time **STRUCTURAL ENGINEER** to join our **Seattle** or **Tacoma** office.

BHC Consultants is an employee-owned and managed consulting engineering, planning, and building code and construction compliance firm with offices in Seattle, Tacoma, and Bellingham, Washington. This is a growing firm with great office dynamics and a significant backlog of consulting services contracts for cities, counties, and special purpose districts in Western Washington. We take pride in providing high quality service to our clients and promoting a positive work-life balance for employees.

The Structural Engineer will be responsible for the structural design of building and civil structures for a wide variety of projects including commercial, industrial, municipal, water and wastewater treatment, pump stations and reservoirs.

The successful candidate will take responsibility for design and specification of structural systems from project definition through construction. This will require interaction with owners, architects, and other engineers. The candidate must be able work within established budgets and schedules and be able to work on multiple projects at the same time.

Key Qualifications:

- Proficient in the design of both civil and building structures
- Proficient in design of reinforced concrete, structural steel, masonry, and wood projects
- Experience working on municipal utility projects
- Experience with reservoirs and standpipes desired
- Experienced in analysis and design in seismic engineering using IBC/ASCE 7 criteria
- Familiar with the design and coordination of fiber reinforced plastic grating and structures
- Experienced in project specification development using both WSDOT and CSI formats
- Capable of performing site investigations and construction site observations
- Working knowledge in the use of ETABS, SAP2000, RISA, Eneclac, Forte, and CivilTech Shoring Suite
- Knowledge in application of Codes including International Building Code, ASCE 7, ACI 350, AWWA D103, D100, and D110
- Familiar with estimating and preparation of Opinions of Probable Construction Costs
- Familiar with development of scopes of services and budgets for design
- Able to prepare Construction Drawings and Specifications for multiple client formats

Requirements:

- A minimum of 5 years of experience
- BS in Civil or Structural Engineering Required
- MS in Structural Engineering Desired
- Licensed Professional Engineer Required
- Licensed Structural Engineer Desired
- Strong verbal and written communication skills

We Offer:

- Generous Total Cash Compensation
